SIDDHI SHILAHAR

Email: siddhishilahar866@gmail.com
Phone: +91 8999592075
LinkedIn: linkedin.com/in/siddhi-shilahar/

OBJECTIVE

Seeking an opportunity to build strong technical skills and leverage analytical thinking for a software engineering role within a growth-oriented and engaging work environment. Eager to contribute effectively to team projects and develop expertise in application design and information technology.

SKILLS

Languages & Fundamentals: Java, Python, HTML, CSS3, JavaScript, DSA, OOP.

Web Frameworks: React, Bootstrap, Tailwind.

Databases: MySQL, MongoDB.

Behavioral Skills: Communication, Presentation, Collaboration, Working Independently, Taking Initiative, Leadership.

EDUCATION

DKTE Textile & Engineering Institute   **2022 – 2026**
B.Tech in Computer Science and Engineering (AIML) *(CGPA: 8.01)*   Ichalkaranji, Maharashtra

Nav Krishna Valley Jr. College   **2020 – 2022**
Higher Secondary Certificate (HSC) *(Percentage: 70.17%)*   Sangli, Maharashtra

R.N. Patil Girls' High School   **2020**
Secondary School Certificate (SSC) *(Percentage: 87.20%)*   Sangli, Maharashtra

EXPERIENCE

Giantwheel Technology | Onsite Frontend Intern   **2026 - Present**
- Assisting in responsive UI styling and frontend optimization, contributing to 20–30% improvement in page responsiveness through cleaner layouts and CSS refinements, while collaborating with an agile team of 4–6 members on production-level web interface maintenance and performance enhancements.

Deloitte | Technology Job Simulation (via Forage)   **2025**
- Completed the Deloitte Technology Virtual Internship (Forage), fixing Python execution errors to unify manufacturing data and drafting a proposal for a real-time operational dashboard with secure system design.

PROJECTS

AI Financial Advisory App
- Developing modular backend components with automated data processing, implementing regression-based and rule-based recommendation models to minimize manual financial analysis effort by 40%, enhance personalization accuracy by 30–35%, and support 100+ simulated user financial profiles with a scalable, maintainable architecture.

Legal Advisor Chatbot
- Built and maintained modular backend services and a structured rule-based chatbot engine to strengthen system reliability by 35%, handle 500+ user queries per day, and optimize response latency by 25% through effective frontend–backend integration.

CERTIFICATIONS

Generative AI Mastermind   **2025**
- Applied AI-assisted development tools, prompt engineering, and rapid prototyping techniques to accelerate full-stack web implementation.

AI Tools Workshop   **2025**
- Utilized prompt engineering, automation tools, and AI-driven workflows to enhance data analysis, presentations, and productivity.

OTHER LANGUAGES AND INTERESTS

Languages Known: English, Marathi, Hindi.

Interests: Front-End Development, Cloud Computing, Exploring New Technologies.
